

Data Engineer Consultant | Python Scripting

Proven leader in cross-functional teams with over 10 years of experience across multiple industries, including **2+ years as a Data Engineer Consultant** in healthcare and banking. **Specializes in Python scripting for developing preprocessing scripts and building robust ETL pipelines.** Strives to design and build data solutions, practice effective data management, and implement data monitoring processes. Continuously upskills with current and emerging data analytics platforms such as **Databricks and Snowflake**. Proficient in SQL and Apache Airflow, with solid understanding of Scala, Kafka, CI/CD practices using Git and GitHub. Dedicated to streamlining processes and delivering high-quality data engineering solutions.

Qualifications

Data Modeling | Data Integration | Data Warehousing | Data Governance & Management
ETL | Performance Tuning | APIs | Data Wrangling | Data Analytics | Data Visualization
Leadership | Team Collaboration | Communication Skills | Project Management | Agile Methodology

Technical Skills: Python, SQL, Bash, C Programming, Matlab, Databricks, Snowflake, Azure Databricks, AWS, Apache Airflow, Kafka, Jenkins, Git, Github, Gitlab, VSCode, Jupyter, PyCharm, Spyder, Tableau, Gen AI, LLMs, AI, Machine Learning

Professional Experience

Jun 2023 to present	Data Engineer Specialist/Consultant <i>Accenture Inc. -- American Multinational Managed Healthcare and Insurance Company</i> - Develop data profiling Python script and integrated it into the initial data validation process for pharmacy claims, reducing the time required to understand the dataset from 4 days to just 1 day. - Implement scalable data models tailored to the specific needs of the client, ensuring efficient storage and retrieval of diverse data types including patient records, billing information, and medical histories within Snowflake data warehouse and Databricks Delta Lake. - Develop and manage ETL pipelines using Apache Airflow and Databricks, orchestrating the extraction, transformation, and loading of data from multiple sources ensuring data integrity and regulatory compliance throughout the process. - Utilize agile and scrum methodologies to iteratively gather client requirements, prioritize tasks, and deliver incremental updates and enhancements to data models and ETL processes during each sprint cycle while fostering collaborative working environment with different cross-functional teams.
Sep 2022 to May 2023	<i>Accenture Inc. -- Australian Bank</i> - Designed and developed at least 2 proof of concept prototypes to assess the viability, security, and performance of proposed solutions, providing valuable insights for decision-making and ensuring alignment with industry regulations and standards. - Contributed to the design and deployment of cloud and non-cloud application solutions for release and platform engineers tailoring its unique requirements and ensuring seamless integration within the bank's existing infrastructure and platform. - Leveraged agile and scrum methodologies to prioritize tasks and meet client requirements within each sprint cycle.
Jul 2022 to Aug 2022	<i>Accenture Inc. -- Short-term Internal Project using Google Cloud Platform</i> Contributed to an internal project by developing a Python ETL script used in migrating an on-premise data warehouse into the GCP environment.
Jan 2022 to May 2022	Quant Feeds and Platform Specialist <i>London Stock Exchange Group (LSEG)</i> - Provided exceptional customer service and built strong client relationships as a product specialist for Refinitiv quant products, effectively addressing inquiries. - Demonstrated technical proficiency by validating financial data, performing comprehensive asset universe comparisons, checking data coverage, and efficiently handling bulk data requests, ensuring accurate and reliable financial data access and analysis for clients.

Jun 2019 to Dec 2021	Portfolio Implementation Specialist <i>Infinet-O Global Ltd</i> - Implemented an automated process for cross-referencing exposure, volatility, and return values, facilitating data consistency and reliability across reports using VBA macros and Python scripts which enhances efficiency and accuracy. - Managed the preparation of performance summary reports for client meetings, spanning monthly, quarterly, and yearly periods for Quants, Product Specialists, and Researchers. - Reviewed and validated data from various Tableau dashboards, including trade generation, fund holdings, cash, drawdown, and FX hedging, and provided daily monitoring email reports to the portfolio implementation team.
Apr 2018 to Jun 2019	Cross-functional role for multiple clients <i>Bunch Tech Corp -- Blockchain Community Manager, Social Media Growth Specialist, Content Moderator</i> - Managed and led multiple blockchain and cryptocurrency communities on Telegram, delivering timely updates on company and technology advancements to community members. - Exhibited strong communication skills by swiftly handling and resolving investor inquiries related to cryptocurrency technology. - Cultivated and sustained relationships with social media influencers, leveraging their reach to promote client products across diverse social media platforms. - Contributed to data quality and technology development by conducting in-depth reviews and categorization of news articles for machine learning models, as well as proficiently classifying image data for image detection models.
Nov 2013 to Dec 2017	R&D Test Engineer <i>Western Digital (formerly HGST Corp.)</i> - Ensured data integrity through thorough data analysis and applying statistical methods in generating actionable customer reports. - Evaluated test productions and optimizing workflow which boosted team KPIs by 40%. - Improved productivity and efficiency by creating Excel templates for data preprocessing which reduced the turnaround time in report generation from 2 days to 1 day.

Certifications and E-Learnings

2024	Databricks Certified Data Engineer Professional
2023	Databricks Certified Data Engineer Associate
	Databricks Platform Architect (AWS, Azure and GCP)
2022	Databricks Lakehouse Fundamentals
	Snowflake Hands On Essentials: Data Warehouse, Data Applications, Data Sharing and Data Lake
	Learning Git and Github
	Natural Language Processing with Classification and Vector Spaces (Coursera)
	Python Parallel and Concurrent Programming Part 1 and Part 2
	Become a RESTful API Developer
	Gitlab Hands-On CI/CD Pipelines & Devops
2021	Machine Learning by Andrew Ng (Coursera)
	Python + SQL + Tableau: Integrating Python, SQL, and Tableau (Udemy)
	The Python Mega Course: Build 10 Real World Applications (Udemy)
2020	CFA Investment Foundations (CFA Institute)
2019	Fundamentals of Visualization with Tableau (Coursera)

Academic Background

2015 – present	Master of Science in Financial Engineering <i>De La Salle University – Manila</i>	<i>Graduate Scholar (2015-2019)</i>	<i>CGPA 3.25</i>
2008 – 2013	Bachelor of Science in Applied Physics <i>University of San Carlos – Technological Center</i>	<i>DOST Scholar</i>	<i>CGPA: 2.02</i>
